MIT COVID IFTTT

1. Provide an educational resource for our community with high-level information
2. Allow for flexibility
3. Provide opportunity for ongoing feedback
What is the situation?

1. Who are you?
   • Student
   • Faculty or Staff

2. Are you accessing campus?
   • Yes
   • No

3. What situation do you want to know more about?
   • I have tested positive
   • I may have been exposed to the virus
   • I know someone who has tested positive

What do you need to know?

• Medical care
• Relevant timelines
• Support resources
• Academic support
• Enhanced cleaning information
• General advice
• Notification protocols
This page will help you learn more about what happens if you or someone in the MIT community test positive for COVID-19. MIT assembled the COVID Monitoring Team to continuously assess the COVID-19 situation at MIT. This team provides information to the COVID Decision Team, composed of senior leaders at the Institute, whose job it is to make decisions related to the health and safety of our community.

There is a large team of people who work to support our entire community after we learn of a positive case. The principles that guide our work are simple and clear: we want to provide robust support, maintain privacy and confidentiality, take an individualized approach, ease community anxiety, maintain confidence in the process, and continuously improve.

Click to the next page to let us know who you are and what your situation is so we can tell you what happens if you have tested positive; may have been exposed to the virus; or know someone who has tested positive. Please remember that this resource is trying to document a complicated and fluid process. If it seems we missed something, got something wrong, or need to add something, please let us know so we can make improvements. This site will be updated regularly.

This resource is not collecting any data or connecting your responses to identifying information. We encourage you to navigate freely through the different scenarios.
S3 Walk-In Hours

• Started in 2010
• In 2018-2019, S3 had over 3,500 walk-ins
• Walk-ins account for almost 50% of in-person visits
• Walk-ins peak around drop date
1. Student shouldn’t have to think about where to turn for help.
2. There should be a front desk for support and wellbeing.
3. It should be easy for students to ask questions.
4. We need to meet students where they are – online!
You shouldn't have to think about where to turn for help. Just ask.
A Student Support and Wellbeing team member will get back to you within 1 business day.
